

CHRISTIAN MORAES

Montevideo, Uruguay | cmmoraespedrozo@gmail.com | [+598 98 690 873](tel:+59898690873) | [LinkedIn](#) | [Portfolio & GitHub](#)

PROFILE

Business and technology-oriented profile with experience in artificial intelligence, machine learning, full-stack development, data analysis, and process automation applied to real-world problems. I combine technical execution with business judgment, using software, AI, integrations, and analytics to improve decision-making and build practical solutions with business impact. My strength lies in learning quickly, adapting to different organizational needs, and connecting technology with real business problems.

EXPERIENCE

AgentBooster

Software & AI Engineer | March 2025 – April 2026

Technical Lead in charge of software and AI operations, overseeing the development of intelligent systems and enterprise automation.

- Process automation with n8n and Python; full-stack development and databases.
- Machine Learning models with TensorFlow and Python.
- LLM agents with Python and LangChain, prompt engineering, and function calling.
- RAG with embeddings and vector databases in PostgreSQL using pgvector and RLS.
- Integrations with APIs/webhooks/MCP and CRMs (Salesforce, HubSpot, Zoho).
- Deployment/hosting of microapps, components with JavaScript, and Docker.
- Analysis of GPT, Claude, Gemini, and Grok models; and AI audiovisual content generation.
- Generative AI and business automation consulting services.

Risolvía

Full-Stack Developer | July 2025 – January 2026

Lead Developer in charge of creating a legaltech web app for client acquisition, integrating AI-driven features and strict data privacy regulations.

- Front-end, back-end, and AI agent development for the legaltech platform.
- RAG, embeddings, and vector database implementation (pgvector in PostgreSQL/Supabase).
- GDPR compliance implementation (consent forms), system hardening, and reCAPTCHA v3/CSS integration.
- Legal research and platform compliance with Uruguayan and Spanish law.

MyEcomProject LLC

Growth Marketing & Automation Developer | April 2024 – October 2025

Business management and direction of acquisition initiatives, aligning marketing strategies with product goals to maximize ROI and scale operations.

- B2B and B2C e-commerce sales, call/in-person closing, objection handling, and consumer psychology.
- Design and management of advertising campaigns for diverse clients across Meta, Google, and TikTok (budgets, segmentation, A/B testing).
- Tracking and tagging management (UTM, conversion events) with reporting and KPIs.
- Custom web integrations programming (Python, APIs) and sales funnel strategy (landing pages, offers, storytelling).
- Design of automated acquisition and nurturing workflows (email, CRM, lead flows).
- Creation and direction of organic and paid media content.

PROJECTS

- **Neural Time Series Forecaster GRU/LSTM** (for UCU - Py, TS, TF)
- **Vision Image Classifier CNN** (for CS231n - Py, TF)
- **KineticGuard ACWR** (iOS/Swift)
- **C-PhysEngine 2D** (C/C++)
- **MAX10 Embedded SoC** (Bare-metal C, Intel FPGA)
- **DevOps Capstone** (Python, Docker, Kubernetes, CI/CD)
- **AgentBooster Web** (React, Vite, TypeScript)
- **Risolvía** (React, Vite, TypeScript, Legaltech)
- **Financial Tracker** (Python, Data Analytics)
- **Python Agent** (Python, Autonomous Agents, Claude)

EDUCATION & CERTIFICATIONS

- **Bachelor in Computer Engineering** – Univ. of the Republic (UDELAR), Montevideo, Uruguay (In progress)
- **Machine Learning Spec.** (Stanford Online)
- **Deep Learning Spec.** (DeepLearning.AI)
- **Adv. ML on Google Cloud** (Google Cloud)
- **Data Science Prof. Cert.** (IBM)
- **Full-Stack Dev. Prof. Cert.** (Microsoft)
- **iOS UI Development** (Meta)
- **Cloud Solutions Architect** (AWS)
- **Applied DevOps Engineering Prof. Cert.** (IBM)
- **Edge AI for Microcontrollers** (Coursera)
- **CS50x** (Harvard)
- **Business Foundations Spec.** (Wharton)

- **Advanced Data Analytics** (Google)
- **IA Heroes Pro** (Learning Heroes)

[View more education and certifications](#)

Languages

- Spanish: Native | English: B1 | Portuguese: Native.

Soft Skills

- Communication, Negotiation, Adaptability, Problem Solving, Teamwork, Leadership.

Technical & Business Skills

Technical areas and tools used across projects, certifications, and applied work:

- **Business, Finance & Strategy:** Business strategy, strategic planning, competitive analysis, go-to-market strategy, operations, financial accounting, corporate finance, financial modeling, forecasting, company valuation, investment analysis, portfolio management, asset allocation, M&A fundamentals, negotiation, conflict management, business decision-making, budgeting, organizational performance, IT/cybersecurity fundamentals.
- **AI, Machine Learning & Data Science:** Artificial Intelligence, Machine Learning, Deep Learning, TensorFlow, Keras, Scikit-learn, Vertex AI, BigQuery ML, AutoML, production ML, ML engineering, model deployment, scalable AI systems, hyperparameter optimization, regularization, supervised learning, unsupervised learning, classification, clustering, anomaly detection, decision trees, neural networks, time series forecasting, computer vision, CNNs, RNNs, GRU/LSTM models, Transformers, recommender systems, reinforcement learning, predictive modeling, statistical analysis, hypothesis testing, data mining, exploratory data analysis, data preparation, data quality improvement, feature engineering, model evaluation, model architecture, ML pipelines, model monitoring, error analysis, concept drift, MLOps, MLflow.
- **LLM Systems & Automation:** LLM agents, LangChain, Claude, prompt engineering, function calling, RAG, embeddings, vector databases, generative AI for business, n8n, Make, workflow automation, process automation, business operations automation, multi-agent workflows, audiovisual AI workflows.
- **Databases, Cloud & BI:** SQL, MySQL, PostgreSQL, Supabase, pgvector, RLS, relational databases, data modeling, indexes, transactions, Google Cloud, AWS, cloud architecture, cloud infrastructure, scalable cloud systems, cloud-native development, cloud computing, compute, storage, networking, IAM, resource management, app deployment, operations monitoring, Databricks, dbt, data pipelines, data analysis, data visualization, business intelligence, Power BI, Tableau, Excel, Pandas, NumPy, Matplotlib, Jupyter.
- **Programming & Software Development:** Python, C/C++, C#, .NET, ASP.NET Core, Swift, JavaScript, TypeScript, HTML, CSS, React, Vite, Node.js, full-stack development, backend development, iOS development, UIKit, SwiftUI, mobile app development, UI development, API integrations, OpenAPI, webhooks, DevOps, macOS, Linux, Docker, Kubernetes, OpenShift, microservices, CI/CD, GitHub, version control, algorithms, data structures, OOP, software engineering fundamentals, debugging, unit testing, troubleshooting, scalability.
- **Web, Growth & Digital Acquisition:** Landing pages, sales funnels, customer journey design, CRM integrations, Salesforce, HubSpot, Zoho, UTM tracking, conversion events, A/B testing, E-commerce strategy, B2B sales systems, media buying, SEO, SEM, conversion copywriting, Meta Ads, Google Ads, TikTok Ads, CMS, WordPress, Shopify.

Additional Technical Areas

- **Hardware, Embedded & Autonomous Systems:** VLSI design, microcontrollers, RTOS, cyber-physical systems, embedded processors, Embedded C, ARM processors, Industrial IoT, Edge AI, TinyML, robotics, sensor fusion, state estimation, motion planning, CARLA simulator, wireless communication, digital design, Quartus Prime, hardware-software integration, power electronics, switching converters, feedback control, small-signal modeling, transfer functions, regulator design.
- **Sports Science, Fitness & Performance Technology:** Exercise physiology, anatomy, kinesiology, fitness assessments, health screening, exercise programming, nutrition for training, fatigue/load monitoring, sports analytics, football performance analysis, player evaluation, AI-powered scouting, tactical analysis, tracking systems, machine learning in sports.
